

SMS Spinnler Fleury AG is located in Niederdorf (Basel) and develops prime innovative solutions for the fully automatic assembly of micromechanical systems for high tech and high precision domains such as watch, medical and electronic industry. In a small team, we are implementing the latest technologies in the field of image recognition, drive systems, quality assurance and automation control in order to create highly reliable and productive systems.

SMS Spinnler Fleury AG has opened a new office and a Research & Development Unit in Balerna (Canton Ticino). The company is expanding its business and we are foreseeing the opening of a new Production Unit in Ticino within the first semester 2019 and this Unit will help the main production, which exists already in Niederdorf (Basel). For this reason, we are recruiting *immediately* new engineers to be based in Niederdorf.

Embedded Software Engineer in Automation (m / f)

Tasks

- Programming of industrial PLC (Beckhoff, Schleicher) in structured text (IEC 61131-3)
